The name

जवाफदेही · Jawafdehi — the word means *accountability* in Nepali. In English we keep the name "Jawafdehi" and gloss it as "accountability" on first use.

Registered name: **Jawafdehi Initiative · जवाफदेही इनिशिएटिभ**

The Nepali spelling is standardised. Please use it exactly as written above — दीर्घ **ही, श** (not स), **भ** (not व). The common noun *जवाफदेहिता* ("accountability") takes ह्रस्व **हि** and is a different word; both spellings above are correct in their own place.

About

This is the text published on our own site. Quote it as our description of ourselves.

नेपाली

Jawafdehi.org नेपालका लागि एक open-source नागरिक प्रविधि प्लेटफर्म हो, जसले भ्रष्टाचारसम्बन्धी आरोपहरू व्यवस्थित रूपमा अभिलेख गर्छ। Gen-Z पुस्ताको पारदर्शिता र जवाफदेहीताको मागमा आधारित यस पहलले नेपालमा संस्थागत उत्तरदायित्व प्रणाली विकास गर्ने लक्ष्य राखेको छ, जसले दीर्घकालीन दण्डहीनताको संस्कृतिको अन्त्यतर्फ योगदान पुर्‍याउनेछ। स्वतन्त्र, प्रमाण-आधारित र नागरिक-संचालित प्रक्रियामार्फत भ्रष्ट राजनीतिज्ञ, व्यक्ति तथा अन्य सरोकारवालालाई उत्तरदायी बनाउनु यसको उद्देश्य हो। सरकारी कागजातहरूको डिजिटाइजेसन (digitization), समाचार स्रोतहरूको अनुगमन र विस्तृत अनुसन्धान प्रतिवेदन तयार पार्न AI प्रविधिको उपयोग गर्दै Jawafdehi.org ले प्रविधिमार्फत भ्रष्टाचारविरुद्धको पहललाई विस्तार र सुदृढ बनाउने प्रयास गर्दछ।

English

Jawafdehi is an open-source civic-tech platform for Nepal built by Nepali to document allegations of corruption. Grounded in a Gen-Z mandate for transparency and action, Jawafdehi aims to become the Nepali accountability system to bring an end to the practice of unaccountability — holding corrupt politicians, individuals, and others accountable through independent, evidence-first, and citizen-powered means. Using AI to process government documents, track news sources, and generate comprehensive investigation reports, Jawafdehi scales the fight against corruption through technology.

Logo

The logo is a database cylinder carrying the Nepal flag, locked up with the Devanagari wordmark जवाफदेही.

File	What it is	Use it on
logo/jawafdehi-logo-navy-for-light-bg.png	Navy wordmark, transparent, 1161×270	White and light backgrounds
logo/jawafdehi-logo-white-for-dark-bg.png	Off-white wordmark, transparent, 1161×270	Navy, black and dark backgrounds
logo/jawafdehi-mark-square.png	The mark alone on white, 1080×1080	Thumbnails, avatars, square slots
logo/jawafdehi-mark-square-transparent.png	The same mark, transparent, 1080×1080	Square slots over a colour of your own
logo/*.svg	Vector masters of both wordmarks	Print, large format, or any size

Every file above carries the brand navy and crimson below.

Rules

Match the variant to the background. The navy wordmark on a dark field disappears; the off-white wordmark on a light field disappears. Both failures have happened in production, so this is the one rule worth checking twice.

Keep clear space of 16% of the logo's height on all four sides. The files are not pre-padded, so this has to come from your layout.

Minimum size is 24 px tall for the full lockup. Below that the ॐ matra collapses into the letter beside it and the flag inside the mark turns into a blob — use the square mark alone instead.

Please don't stretch it (the lockup is 4.30:1 and must stay there), re-draw it, re-space it, re-colour it, or place it on a photograph without a solid field behind it. To change its colour, switch to the other variant — that is what the pair is for.

Colours

The hex value is the canonical one.

Role	Hex
Primary — Navy	#0E1F3B
Accent — Crimson	#B5242C
Accent on dark backgrounds	#F04C54
Background — warm white	#FAFAF7
Body text	#1F2937

Crimson is never set as text on navy — the contrast is only 2.6:1. Use #F04C54 there instead. Our background is the warm white #FAFAF7, not pure #FFFFFF.

Typography

Role	Typeface
Display and headings	Vesper Libre
Body and UI	Noto Sans Devanagari
Figures, dates, case references	IBM Plex Mono

Vesper Libre covers both Latin and Devanagari, so a bilingual headline stays in one face. Devanagari needs its own metrics — looser leading than Latin — because of matra stacking; please don't set Devanagari copy on Latin metrics.
